

A Strong Duo: 5-Axis Centre and Sinutrain

5-Axis Milling Machine for Vocational Training

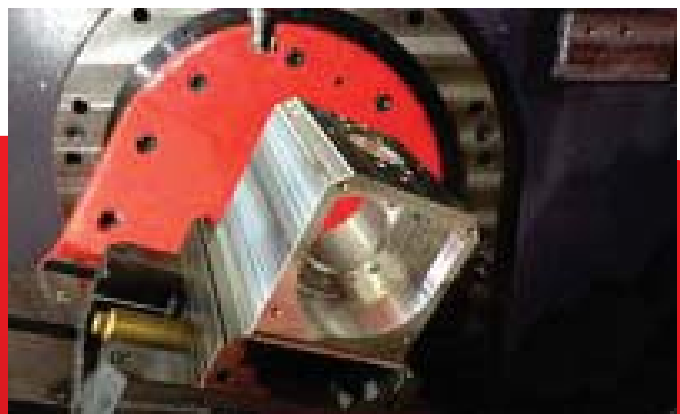

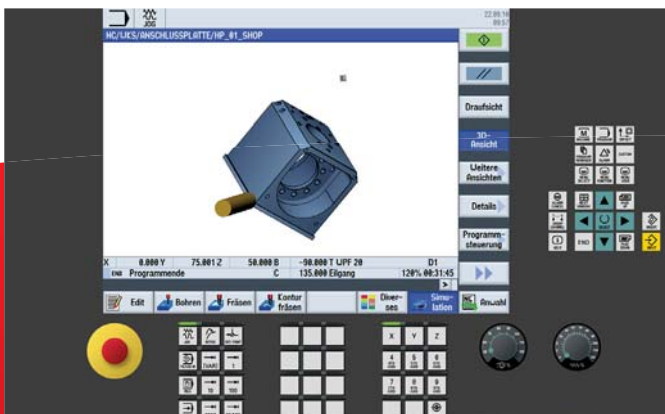

Maxxmill 400, the compact 5-axis milling centre, teamed with Sinutrain training software for Sinumerik Operate for school-based and company-based training: Comprising the Maxxmill 400 machine including a basic accessories package, a Sinutrain package for 18 licences as well as EMCO CAMPUS for 20 users, this package is offered at a very attractive price:

EUR 99,500.00 plus VAT*

SinuTrain training software for SINUMERIK Operate simulates the SINUMERIK 840D sl or SINUMERIK 828D control including the SINUMERIK Operate user interface on your PC.

Illustration and behaviour correspond to the originals:

- The illustration of the operator panel front, machine control panel and user interface correspond to the original design, which allows for real operation.
- The user interface corresponds to the original SINUMERIK Operate interface.
- The simulation is identical with the real control.
- The full functionality of SINUMERIK Operate on SINUMERIK 840D sl/828D is available.

The logo for EMCO group, featuring the word "emco" in a bold, lowercase, sans-serif font, followed by "group" in a smaller, lowercase, sans-serif font. The text is white and set against a red rectangular background.
